

ALFIE EDWARDS

Senior Embedded Software Engineer | Agile | Innovator

+44 20 7123 4567 Email linkedin.com Cardiff, UK

AE

SUMMARY

Talented Senior Embedded Software Engineer with 11 years of experience in C++ and ARM Cortex microprocessors. Delivered innovative solutions reducing operational downtime by 50%. Passionate about enhancing software quality and advancing technology in the power industry.

SKILLS

C++ 11/14/17 Embedded Software Design ARM Cortex Microprocessors Low-Level Protocols Unit Testing
Source Control Systems Linux Development Agile Methodologies Continuous Integration
Cloud Communication Interfaces

EXPERIENCE

- 01/2019 - 09/2023 Cardiff, UK ● Senior Embedded Software Engineer
Schneider Electric
- Led a team in developing embedded software solutions for power measurement devices, enhancing efficiency by 30%.
 - Facilitated communication between embedded devices and cloud services, resulting in improved data accessibility by 40%.
 - Responsible for bringing up firmware on newly-designed hardware platforms, reducing time-to-market by two months.
 - Implemented robust code adhering to industry standards, decreasing error rates in deployment by 25%.
 - Spearheaded process efficiency improvements, increasing product quality ratings by 15%.
 - Expanded product scalability as deployment scaled, improving customer satisfaction metrics by 20%.
- 06/2015 - 12/2018 London, UK ● Embedded Software Engineer
Siemens
- Developed embedded systems with expertise in C++11, impacting performance and reliability by 35%.
 - Collaborated with cross-functional teams to interface with ARM Cortex microprocessors, enhancing system capability.
 - Improved system protocols (SPI, I2C, RS232), refining data transfer speed by 25%.
 - Managed software development lifecycle projects, achieving deliverables timely and within budget constraints.
 - Implemented unit testing frameworks with 100% coverage to ensure software quality prior to release.
- 09/2012 - 05/2015 Birmingham, UK ● Software Developer
Eaton
- Designed and developed software components improving operational capability of embedded devices by 20%.
 - Collaborated with teams to deploy software solutions into new hardware, ensuring successful integration.
 - Adapted to changing project priorities effectively, maintaining agile methodologies throughout.
 - Contributed to source control systems by implementing best practices and improving usage efficiency by 10%.

EDUCATION

- 01/2009 - 01/2012 Bristol, UK ● Master of Engineering in Software Engineering
University of Bristol
- 01/2006 - 01/2009 Cardiff, UK ● Bachelor of Science in Computer Science
Cardiff University

PROJECTS

Energy Monitoring Solution

Developed a niche embedded solution for energy consumption tracking. Source code at: github.com/alfie-energy-monitor

Automated Testing Framework

Created a comprehensive testing framework to ensure robust software delivery. Source code at: github.com/alfie-testing-framework

KEY ACHIEVEMENTS

Award for Outstanding Innovation

Recognised for developing an embedded software solution that reduced operational downtime by 50%.

Successful Product Launch

Led the team that introduced a new firmware version that increased market penetration by 15%.

Efficient Team Leadership

Enhanced team operation efficiency by 30% through effective leadership and strategic project delegations.
