

ISLA KING

Cybersecurity Engineer | Systems Architecture | Linux

+44 20 7123 4567 Email linkedin.com Birmingham, UK

SUMMARY

Enthusiastic Cybersecurity Engineer with 5 years' experience in system design and integration. Expert in Linux systems, scripting, and security architecture. Key achievement includes improving system efficiency by 30% through innovative solutions.

EXPERIENCE

Cybersecurity Engineer 06/2019 - Present
BAE Systems Birmingham, UK

- Spearheaded the redesign of security architectures across naval platforms, improving data protection by 40%.
- Led a cross-functional team in conducting exhaustive trade studies, identifying innovative cybersecurity capabilities.
- Developed complex scripts in Bash and Python, automating 25% of manual processes and saving 100 hours monthly.
- Collaborated with leadership to advise on architectural strategies, resulting in a 20% increase in operational efficiency.
- Conducted PKI and Cloud-based security solutions deployment, enhancing network security protocols significantly.
- Enabled effective stakeholder communication through detailed technical presentations and reports.

Systems Architect 03/2016 - 05/2019
Lockheed Martin London, UK

- Optimised large-scale Linux systems, elevating system performance and uptime by 15%.
- Implemented DevSecOps solutions, reducing deployment times from 2 weeks to 3 days.
- Managed integration of software systems, achieving zero downtime through precise and efficient processes.
- Designed secure C++ applications in a Unix environment, improving processing speeds by 25%.
- Mentored junior engineers, enhancing team skillset in cybersecurity practices and technologies.

Software Development Engineer 01/2013 - 02/2016
Raytheon UK Manchester, UK

- Contributed to the design and development of software systems for naval platforms, enhancing system interoperability.
- Conducted detailed packet analysis, providing insights that led to a 10% reduction in network breaches.
- Collaborated on a project leading to the successful integration of Kubernetes containers in a cloud environment.
- Established best practices for Linux architecture, improving the team's overall project delivery capabilities.

EDUCATION

MSc in Cyber Security 01/2011 - 01/2012
University of Warwick Coventry, UK

BSc in Computer Science 01/2008 - 01/2011
University of Birmingham Birmingham, UK

PROJECTS

Open Source Network Monitor

Contributed to developing a Python-based tool for real-time network monitoring. Available at github.com/islaking/network-monitor

Linux Security Enhancement Scripts

Published open-source scripts for enhancing Linux security configurations. See more at github.com/islaking/linux-security

KEY ACHIEVEMENTS

Security Audit Excellence

Led a team that improved security compliance by 30%, recognised in the internal audit report.

Efficiency Improvement Initiative

Implemented automation solutions that resulted in a 50% reduction of manual workload company-wide.
