SUMMARY

With over 8 years in the software development sector, I have honed my skills in various programming languages and have delivered high-performance financial applications. My career is marked by a track record of driving product innovations and optimizing software processes, most notably reducing database load times and integrating multi-currency exchange features that significantly expanded user engagement.

EXPERIENCE

Lead Software Engineer

FinTech Solutions Ltd

06/2019 - Present Edinburgh, UK

- Led a team of 5 developers in creating robust financial modeling software that processed over £10m transactions monthly
- Enhanced system performance by optimizing database queries, reducing load time by 30% and improving customer satisfaction
- Implemented a continuous integration pipeline that decreased bug incidence by 25% and streamlined development workflow
- Coordinated with business analysts and product managers to deliver 10+ major product features per quarter, boosting user engagement by 20%
- Developed a comprehensive unit testing protocol that ensured 99.9% uptime for critical financial applications
- Spearheaded the migration of legacy systems to cloud-based infrastructure, improving scalability and deployment times by 40%

Senior Software Developer

BankTech Innovations

03/2015 - 05/2019 Glasgow, UK

- Designed and implemented an end-to-end secure payment gateway, handling over £5m in transactions weekly
- Played a key role in the development of a multi-currency exchange feature, which increased user base by 15% across European markets
- Mentored 3 junior developers, enhancing the team's technical capabilities and decreasing onboarding time by 50%
- Optimized existing codebase, which led to a reduction in system outages by 20% and contributed to higher client retention
- Pioneered the integration of an AI-based fraud detection system, cutting down fraudulent transactions by 60%

Software Developer

Global Finance Tech

09/2012 - 02/2015 Edinburgh, UK

- Implemented new features for an investment tracking platform, resulting in a user growth of 10% within the first quarter
- Collaborated on a cross-functional team to redesign the user interface, improving user experience scores by 25%
- Contributed to the reduction of load times for high-traffic applications by optimizing code, achieving a performance boost of 15%
- Resolved critical bugs, ensuring 99% system uptime and enhancing customer trust and business continuity

EDUCATION

MSc Computer Science

University of Edinburgh

01/2011 - 01/2012 Edinburgh, UK

BSc Software Engineering

Heriot-Watt University

01/2007 - 01/2011 Edinburgh, UK

PROJECTS

Open Source Payment Gateway

Contributed to the development of a secure, scalable open source payment gateway designed for small businesses. Visit the project at github.com/OpenSourcePaymentGateway

Blockchain-Based Voting System

Involved in creating a decentralized voting platform leveraging blockchain technology for transparency and security. Project repository at github.com/BlockchainVotingSystem

KEY ACHIEVEMENTS

Annual Coding Hackathon Winner

Lead a team to victory in an annual national coding hackathon by building an innovative finance tracking tool.

Employee of the Year

Recognized as Employee of the Year at BankTech Innovations for exceptional contributions to the product development team and client success.
